Procedure Note (EGD)

**Procedure Name:** Esophagogastroduodenoscopy (EGD)

**Endoscope Model:** Olympus EVIS EXERA II

**Route:** Oral

**Patient Positioning:** Left lateral decubitus

**Bite Block:** Used

**Narrative:** The procedure commenced with entry through the oropharynx, navigating past the upper esophageal sphincter smoothly. The esophageal mucosa appeared normal, with the Z-line located at 38 cm from the incisors. The gastroesophageal junction was identified without any signs of Barrett's esophagus or strictures. The stomach was thoroughly insufflated, revealing normal rugal folds with mild erythema in the antrum but no erosions or ulcers. The pylorus was patent. Examining the duodenum, the bulb and second portion appeared normal with visible villi and no signs of inflammation or ulcers. Retroflexion was performed in the stomach to assess the cardia and fundus, with no abnormalities noted.

**Findings:**

- Esophagus: Normal Z-line at 38 cm, no lesions
- Stomach: Mild erythema in antrum, no ulcers
- Duodenum: Normal appearance, no lesions

**Impression:** Mild antral erythema, likely gastritis; otherwise normal EGD.

**Diagnosis List:** Mild gastritis, GERD

**Interventions:** No biopsies or therapeutic interventions performed.

**Endoscopy Team:**

- Endoscopist: Dr. Samantha Klein, MD
- Assistant: Lucy Brown, RN
- RN Circulator: Mark Stevens, RN
- Endoscopy Tech: Sarah White

## After Visit Summary / Discharge Instructions

**Recovery Course:** The patient experienced no pain or nausea in the recovery area. Vital signs remained stable throughout the recovery period. The patient tolerated oral intake without difficulty.

### Instructions:

- **Diet:** Resume normal diet as tolerated. Avoid spicy foods if dyspepsia occurs.
- **Activity:** Rest for 24 hours, avoid driving or operating machinery today.
- **Warning Signs:** Seek immediate medical attention if experiencing severe abdominal pain, vomiting blood, or black tarry stools.
- **Follow-up:** Appointment scheduled with Dr. Klein in 4 weeks.

**Medication Plan:** Continue Omeprazole 40mg daily. Avoid NSAIDs. Resume other medications as per routine.

**Results Communication Plan:** Results will be discussed during the follow-up visit. No pathology specimens were taken.

**Patient Understanding:** The patient verbalized understanding of the discharge instructions and will be escorted home by a family member.

**Discharge Educator:** Anna Lopez, RN

**Discharge Time:** 10:45 AM
