Cover Page

Patient Demographics:

- **Full Name:** Evelyn Harper
- **Date of Birth:** 02/27/1988
- **Current Age:** 38 years
- **Gender:** Female
- **Medical Record Number:** 6723845
- **Insurance:** UnitedHealthcare

Provider Information:

- **Provider:** Dr. Michael Johnson, MD
- **NPI:** 1234567890
- **Place of Service:** Office (Code 11)

Problem List

1. **Type 2 Diabetes Mellitus with Complications**
 - Diabetic peripheral neuropathy (ICD-10: E11.40)
 - Diabetic chronic kidney disease, stage 2 (ICD-10: E11.22)
2. **Essential Hypertension** (ICD-10: I10)
3. **Hyperlipidemia** (ICD-10: E78.5)
4. **Overweight, BMI 28-29** (ICD-10: E66.3)

Medication List (Current as of Visit 5)

- **Metformin 1000mg** BID
- **Lisinopril 10mg** daily
- **Atorvastatin 20mg** daily
- **Insulin Glargine 10 units** at bedtime (added following Visit 4)

Visit Notes

Visit 5: April 10, 2026

Date of Service: 04/10/2026

Provider: Dr. Michael Johnson, MD, NPI: 1234567890

Place of Service: Office

Visit Type: Established Patient

Documentation (SOAP Format):

- **Chief Complaint:** Diabetes follow-up
- **HPI:** Evelyn returns for her quarterly diabetes follow-up. She reports better adherence to her insulin regimen following the previous visit and adjustments made. Her fasting glucose readings have been within the target range over the past month.
- **ROS:**
 - General: No recent weight change.
 - Eyes: No vision changes reported.
 - Musculoskeletal: Mild tingling in feet remains stable.
- **Physical Exam Findings:**
 - Well-nourished female in no acute distress.
 - No retinopathy noted on funduscopic exam.
- **Vital Signs:**
 - BP: 128/82 mmHg
 - HR: 72 bpm
 - Weight: 180 lbs
 - Height: 5'6"
 - BMI: 29
 - Temp: 98.6°F
 - Glucose: Not measured in office
- **Lab Results:**

- HbA1c: 7.3%

- **Assessment:**

1. Diabetes well-controlled post medication adjustment.
2. Mild diabetic peripheral neuropathy - stable.
3. CKD stage 2 due to diabetes - stable with no progression.
4. Blood pressure controlled with current regimen.

- **Plan:**

- Continue Metformin and Atorvastatin.
- Maintain current Insulin dosage, monitor glucose.
- Routine follow-up in 3 months.
- Recommending annual renal function test for CKD monitoring.
- Lifestyle counseling on diet and exercise adherence.

Coding:

- ICD-10 Codes: E11.40, E11.22, I10, E78.5
- CPT Code: 99213 (Established patient, moderate complexity)
- Charge Amount: \$250

Visit 4: January 24, 2026

Date of Service: 01/24/2026

Provider: Dr. Michael Johnson, MD, NPI: 1234567890

Place of Service: Office

Visit Type: Urgent Established Patient

Documentation (SOAP Format):

- **Chief Complaint:** High glucose readings among holiday seasons.

- **HPI:** Evelyn presents urgently due to recent elevated glucose levels following dietary indiscretions during the holiday period. She admits to inconsistent medication adherence.

- **ROS:**

- Endocrine: Feeling more fatigued than usual.
- Cardiovascular: No chest pain or palpitations.
- Neurological: Increased numbness in the feet.

- **Physical Exam Findings:**

- Alert, appears fatigued.
- Mild pedal edema observed.

- **Vital Signs:**

- BP: 136/88 mmHg
- HR: 78 bpm
- Weight: 185 lbs
- Height: 5'6"
- BMI: 30
- Temp: 98.9°F
- Glucose: High

- **Lab Results:**

- HbA1c: 8.1%

- **Assessment:**

1. Elevated HbA1c indicates poor diabetic control.
2. Increase in neuropathy symptoms correlates with glycemic instability.

- **Plan:**

- Intensify diabetes management with initiation of Insulin Glargine 10 units at bedtime.
- Emphasize the importance of medication adherence.
- Refer to diabetes educator for dietary guidance.
- Ophthalmology referral renewed for retinal assessment.

Coding:

- ICD-10 Codes: E11.40, E11.22, I10
- CPT Code: 99214 (High complexity management)
- Charge Amount: \$320

Visit 3: October 5, 2025

****Date of Service:** 10/05/2025**
****Provider:** Dr. Michael Johnson, MD, NPI: 1234567890**
****Place of Service:** Office**
****Visit Type:** Established Patient for Flu Vaccine**

****Documentation (SOAP Format):****

- ****Chief Complaint:**** Flu vaccine
- ****HPI:**** Evelyn is in for her annual flu vaccination. She notes overall satisfaction with her current diabetes treatment, reporting no significant changes in symptoms or health status.

- ****ROS:****
- Musculoskeletal: Stable mild hand and foot paresthesias.
- Respiratory: No cough or shortness of breath.
- Gastrointestinal: Appetite stable.

- ****Physical Exam Findings:****
- Healthy appearance, no acute distress.

- ****Vital Signs:****
- BP: 126/80 mmHg
- HR: 70 bpm
- Weight: 182 lbs
- Height: 5'6"
- BMI: 29
- Temp: 98.5°F

- ****Assessment:****
- Type 2 Diabetes in satisfactory control at present.
- Administered flu vaccine; no adverse reaction.

- ****Plan:****
- Encourage continuation of current diabetes regimen.
- Return for follow-up in 3 months.

****Coding:****
- ICD-10 Codes: E11.40, E11.22
- CPT Code: 99211 (Simple problem-focused visit)
- Additional CPT Code: 90471 (Flu vaccine administration)
- Charge Amount: \$180

Visit 2: July 12, 2025

****Date of Service:** 07/12/2025**
****Provider:** Dr. Michael Johnson, MD, NPI: 1234567890**
****Place of Service:** Office**
****Visit Type:** Established Patient**

****Documentation (SOAP Format):****

- ****Chief Complaint:**** Routine diabetes follow-up
- ****HPI:**** Evelyn is following up after recent treatment adjustments. She reports adherence to her current medication regimen with some dietary lapses earlier but feels her blood glucose control has improved overall.

- ****ROS:****
- Eyes: No issues with vision, upcoming eye exam scheduled.
- Neurological: Numbness in feet unchanged.
- Integumentary: No skin ulcers or infections.

- ****Physical Exam Findings:****
- Well-appearing, no acute distress.
- Sensory exam consistent with known neuropathy.

- ****Vital Signs:****
- BP: 130/85 mmHg
- HR: 74 bpm
- Weight: 183 lbs
- Height: 5'6"
- BMI: 29
- Temp: 98.4°F

- **Lab Results:**

- HbA1c: 7.5%

- **Assessment:**

1. Improved HbA1c signifies better diabetic control.
2. Neuropathy currently stable without advancement.

- **Plan:**

- Continue current medication regimen.
- Annual ophthalmology referral confirmed.
- Follow-up in 3 months.

Coding:

- ICD-10 Codes: E11.40, E11.329, I10
- CPT Code: 99213 (Moderate complexity)
- Charge Amount: \$230

Visit 1: April 18, 2025

Date of Service: 04/18/2025

Provider: Dr. Michael Johnson, MD, NPI: 1234567890

Place of Service: Office

Visit Type: Established Patient

Documentation (SOAP Format):

- **Chief Complaint:** Quarterly diabetes management.
- **HPI:** Evelyn is in for her routine diabetes follow-up. She was diagnosed 3 years ago and maintains a busy schedule with work and family obligations. She reports adhering to Metformin but finding lifestyle modifications challenging.

- **ROS:**

- Cardiovascular: No dizziness or palpitations.
- Gastrointestinal: Regular bowel habits.
- Genitourinary: No dysuria or hematuria.

- **Physical Exam Findings:**

- No acute illness, appears well-groomed.

- **Vital Signs:**

- BP: 134/86 mmHg
- HR: 76 bpm
- Weight: 180 lbs
- Height: 5'6"
- BMI: 29
- Temp: 98.3°F

- **Lab Results:**

- HbA1c: 7.8%

- **Assessment:**

1. Diabetes well-managed but slightly above target HbA1c.
2. Encourage adherence to lifestyle changes.

- **Plan:**

- Educate on dietary adjustments and increased physical activity.
- Follow existing medication regimen.
- Reassessment in 3 months.

Coding:

- ICD-10 Codes: E11.40, E11.22, I10, E78.5
- CPT Code: 99213 (Moderate complexity)
- Charge Amount: \$230
