Patient Registration / Demographics

Patient Name	Lucas Hernandez	MRN	5208673491
Date of Birth	March 6, 1985 (38 Years)	Account	76321984
Sex	Male	Insurance	Good Health Plan
Address	4376 Meadow Ave, Flat No 12, Healthy City, NY, 00123	Emergency Contact	Ana Hernandez, 555-436-8901

Encounter Date	February 19, 2023
Check-In Time	07:30
Location	Endoscopy Suite 2, Sunrise General Hospital
Attending Gastroenterologist	Dr. Jenna Collins, MD
Referring Provider	Dr. Mikayla Thompson
Chief Complaint / Indication	Evaluation of chronic dyspepsia and early satiety
Past Medical History	Hypertension, GERD
Past Surgical History	Laparoscopic cholecystectomy - 2015
Family History	Mother - colon cancer (deceased); Father - alive, hypertension
Social History	Non-smoker, drinks socially
Allergies	Penicillin (rash)

Problem List	Analyzing intractable dyspepsia
Current Medications	Amlodipine 5 mg once daily; Omeprazole 20 mg twice daily; Multivitamin daily; Metformin 500 mg twice daily; Simvastatin 10 mg nightly
Pre-procedure Vitals	Blood Pressure: 128/82 mmHg, Pulse: 76 bpm, Respiratory Rate: 18/min, Saturation: 98% on room air
ASA Classification	Class II
Informed Consent	The patient has been informed of the procedure, risks, and benefits, and has given explicit consent.

EGD Procedure Note

Procedure: Esophagogastroduodenoscopy (EGD)"

Equipment: Scope Model GX50

Procedure narrative: Initiation underwent via standardized oro-nasal pharynx entry while the patient was comfortably laid on their left lateral side supported by a fresh sterile bite block.

- Esophagus appeared linear without presence of varices or abnormal vascular patterns. Z-line successively positioned at 41 cm from incisors.
- Stomach: Well delineated rugal pattern. Notable flushed patches and minute erosive states pinpointed throughout the body.
- Duodenum: First part with normal villous surface; second part smooth yet depicted mild inflammatory habitus.

Impression: Findings signify erosive gastritis amid commonplace inflammation observation.

Diagnosis: Confirmed feature of mild erosive gastritis.

Intervention Summary: Biopsy six solutes individually extracted by forceps sampling from varying recognized gastric corridors were retained coated under formalin back set notation as priority lab work.

Endoscopy Team: Dr. Jenna Collins, MD; Endoscopy Nurse (Circulator): Jamie Hudson, RN; Endoscopy Tech: Mark Baylor
